

# **exhibitly**

An app to allow users to curate online collections of artworks from numerous institutions.

## **Minimum Viable Product**

Must use at least two Museum or University free APIs.

A user can provide some search criteria to filter and sort artworks.

- The artworks can then be saved into a temporary collection, which can be viewed and expanded.
- Images and core information about the artwork are displayed when a user interacts with a thumbnail or other indicator of an artwork from the exhibition.
- The user can select which artworks they want to include in an exhibition they are creating which persists for the duration of their session.

## **Stretch Goals**

- User accounts for collection permanence
- Sharable links to collections

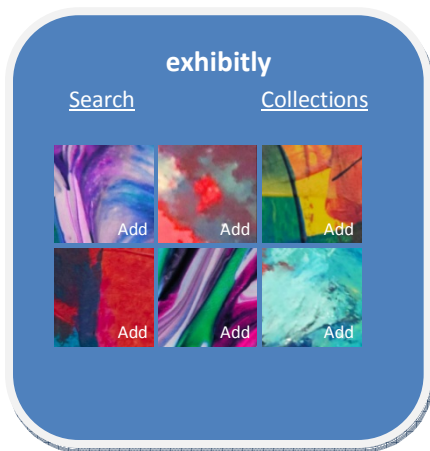

## **User Stories**

- As a user on a first visit, I want to quickly see examples of the artworks I can view on exhibitly.
- As a user, I want to find an artwork by name.
- As a user, I want to filter the displayed artworks by category.
- As a user, I want to read the details of any one of the artworks.
- As a user, I want to create collections of artworks.
- As a user, I want to add and remove artworks to/from my collections.

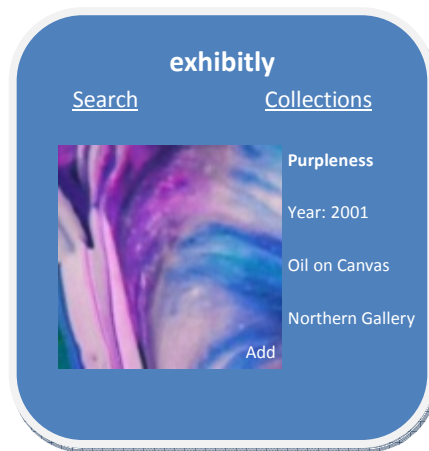

## **User Stories for Stretch Goals**

- As a user, I want to create an account
- As a user, I want to share a link to my collection, to be viewed by others
